The School of Engineering and Applied Sciences will host a week of special events to inspire current and future engineers at the University of the District of Columbia. On campus events will include a visit to the Center of Excellence for Renewable Energy, IEEE Student Brunch Session, an IEEE Washington DC Comsoc Event, several student and projects presentations, and Best paper (project) award. Breakfast and lunch will be served to all attendees on February 17, 2096, room 41/A-03.

The National Engineers Week Foundation, a formal coalition of more than 100 professional societies, major corporations and government agencies, is dedicated to ensuring a diverse and well-educated future engineering workforce by increasing understanding of and interest in engineering and technology careers among young students and by promoting pre-college literacy in math and science. Engineers Week also raises public understanding and appreciation of engineers' contributions to society. Founded in 1951 by the National Society of Professional Engineers (NSPE), it is among the oldest of America's professional outreach efforts.

For more information about E-Week at UDC, contact Dr. Paul Cotae (202) 274 6290. If your club or organization would like to get involved with E-Week, please send an email to the E-Week Chair pcotae@udc.edu.

Invited speaker for this event is Dr. John Waclawsky, the Chief Software Architect for the Motorola Software Technology Groups.

He is responsible for leading the Motorola Software team in concert with the Motorola Business Units, Labs and the CTO organization in constructing unified software architecture for Seamless Mobility useful across Motorola’s business units for coordinated product and solution development.

The lecture title is: The Revolution at the Edge of Network.
