UNIVERSITY OF THE DISTRICT OF COLUMBIA
COMMUNITY COLLEGE
DIVISION OF NURSING, ALLIED HEALTH, LIFE AND PHYSICAL SCIENCES

AAS NURSING STUDENT HANDBOOK 2019-2020

Designed for Undergraduate Students.
Dear Nursing Students:

On behalf of the faculty and staff of the Associate Degree Nursing program, we extend a hearty welcome to you. We applaud you for making the decision to join the ambitious students who have resolved to maintain excellence in nursing by attending the nursing program at the University of the District of Columbia Community College (UDC-CC). We urge you to make a determined commitment to the program to translate your aspirations to concrete reality.

Nursing continues to be one of the most highly trusted professions in the United States. We challenge you to advance the exemplary image of the profession through your commitment to safe, effective, and quality care to all your clients. The nursing program has a cadre of highly qualified and devoted faculty who are favorably disposed to providing state of the art instruction and guidance throughout your study program. The program also has the most up-to-date high-fidelity simulators with over 60 case scenarios that cut across the entire course curriculum. We encourage you to take full advantage of the simulation lab activities and faculty wealth of knowledge and experience. The faculty and nursing administration will hold you accountable to learn the scholarly skills needed to ensure excellence in nursing.

Within the pages of this Student Handbook are policies that will guide you along the journey. The student policies are congruent with those of the University of the District of Columbia Community College. Differences between the Associate Degree Nursing Program policies and UDC-CC’s general policies are justified by the goals and outcomes of the Associate Degree Nursing Program.

We welcome you once again and wish you all a productive and fully rewarding experience at the University of the District of Columbia Community College.

Sincerely,

Vonda Rogers

Disclaimer

The UDC-CC Associate of Applied Science Degree Nursing Program (“AAS Nursing Program”) reserves the right to alter contents of the Nursing Student Handbook with notice to students as necessary. Students will be notified of the change in a timely manner, given an electronic and mailed copy of the change, and must sign that they have received and understood the change. Updates may be necessary as the District of Columbia Board of Nursing and the Accreditation Commission for Education in Nursing, Inc. regulations may change.

Approval and Accreditation

The AAS Nursing Program has Conditional Approval from the District of Columbia Board of Nursing. Graduates of this nursing program are allowed to write the NCLEX-RN® Licensing Examination. The AAS Nursing Program is not accredited at this time. Instead, the Accreditation Commission for Education in Nursing (ACEN) has granted Candidacy status effective January 2017 to the AAS Nursing Program. The Candidacy process is the prerequisite step toward formal review for ACEN initial accreditation. More information about accreditation may be found at:

ACEN
3343 Peachtree Road, NE, Suite 850
Atlanta, GA 30326
404-975-5000

Federal Title IV Aid

The AAS Nursing Program is currently ineligible for Federal Title IV Aid.
About the National League for Nursing

Dedicated to excellence in nursing education, the National League for Nursing (“NLN”) is the preferred membership organization for nurse faculty and leaders in nursing education. NLN members include nurse educators, education agencies, health care agencies, and interested members of the public. The NLN offers faculty development programs, networking opportunities, testing and assessment, nursing research grants, and public policy initiatives to its 40,000 individual and 1,200 institutional members.

Founded in 1893 as the American Society of Superintendents of Training Schools for Nurses, the NLN was the first nursing organization in the United States. Today the NLN is a renewed and relevant professional association for the twenty-first century. Cited by the American Society of Association Executives for the ‘will to govern well,” the NLN is committed to delivering improved, enhanced, and expanded services to its members and championing the pursuit for quality nursing education for all types of nursing education programs. The NLN is headquartered in Washington, DC and is led by a board of governors elected at large by the membership for three-year terms. The volunteer president of the board works closely with the NLN’s chief executive officer. UDC-CC AAS Nursing Program faculty members are proud members of NLN.

About OADN

Founded in 1984, the Organization for Associate Degree Nursing (OADN) is recognized nationally as the voice for Associate Degree Nursing. OADN is dedicated to enhancing the quality of Associate Degree Nursing education, strengthening the professional role of the Associate Degree Nurse, and promoting the future of Associate Degree Nursing as an entry point into registered nursing in the midst of healthcare changes.

As the leading advocate for Associate Degree Nursing, OADN promotes academic progression of graduates in furthering education to reach their maximum professional potential. All associate degree nurses should have access to pursue additional nursing education. OADN welcomes partnerships and collaboration with the other national nursing organizations to support academic progression in nursing, leadership, and improvements in healthcare practice and delivery. Collaboration with these organizations will facilitate the unity of the nursing profession. OADN continues to disseminate information and provide an arena for collegial networking to those who are passionate about Associate Degree Nursing.

ADN collaborates with national nursing organizations to ensure the voice of associate degree nursing remains at the forefront to promote academic progression. OADN has partnerships with the Robert Wood Johnson Foundation Academic Progression in Nursing Advisory Committee, the Center to Champion Nursing in America, Nursing Community, Nursing Alliance, Nurses on Boards Coalition, the American Nurses Association, the National League for Nursing; the American Association of Colleges of Nursing; American Nurses Association; and the American Organization for Nurse Executives. The UDC-CC AAS Nursing Program faculty members are proud members of OADN.

*NOTE: The descriptions of NLN and OADN are adapted from the websites for each organization and are presented here with permission of the respective organizations.

I. INTRODUCTION

OVERVIEW

The University of the District of Columbia (UDC) Undergraduate and Graduate Catalog and Student Handbook provide information regarding the general policies for enrolled students.

The Nursing Program Student Handbook provides direction and guidance to nursing majors regarding policies, procedures, and regulations specific to activities and services unique to the Nursing Program. These policies are specific to nursing students and may differ from university policies on the same subject.

The Nursing policies are subject to modification as regulatory changes governing nursing education direct and when program development and/or curriculum revisions occur. The Nursing faculty reserves the right to make curriculum revisions and policy changes provided these changes will not impact accepted nursing majors by lengthening the projected period of time required to obtain a degree with a major in nursing. Students are responsible for posted changes that become effective prior to the publication of the next Nursing Student Handbook. Therefore, students are advised to read the nursing notices posted at 801 North Capitol Street, NE near the office suite on the eighth floor.

Currently, the AAS Nursing Program within UDC-CC offers two undergraduate nursing tracks: the generic Associate of Applied Science in Nursing (AASN) cohort and the accelerated Associate of Applied Science in Nursing (LPN-RN) cohort. The University of the District of Columbia is accredited by the Commission of Higher Education - Middle States Association of Colleges and Schools.

The undergraduate nursing program has Conditional Approved by the District of Columbia Board of Nursing. At this time the AAS Nursing Program is not accredited. In January 2017, UDC-CC AAS Nursing Program was awarded Candidacy status by Accreditation Commission for Education in Nursing, Inc. (ACEN). The ACEN website is http://www.acenursing.org, 3343 Peachtree Road NE, Suite 850 | Atlanta, GA 30326, and telephone number is (404) 975 5000.

HISTORICAL PERSPECTIVE

The University of the District of Columbia (UDC) is an urban land-grant institution of higher education with an open admission policy. It exists as the only institution of public higher education in the city and was formed in 1976 by the merger of three predecessor institutions: Washington Technical Institution (WTI), Federal City College (FCC), and the District of Columbia Teachers College (DCTC). It is recognized as a comprehensive, public, urban land-grant institution offering quality, affordable postsecondary education to District of Columbia (DC) residents at the certificate, associate, baccalaureate, and graduate levels. It is one of two Historically Black Colleges and Universities (HBCU) in DC with nursing education units.

At its inception, nursing education at UDC included a generic bachelor’s degree, an RN-BSN Tract or Pathway, and a generic associate degree. The associate degree began at WTI in 1966 and the baccalaureate degree began at the Federal City College FCC in 1967. AASN + Registered Nurse (RN) to Bachelor of Science in Nursing (BSN) 2 + 2 program was adopted during the fall 1995 semester with full implementation in 1996. The generic BSN program graduated the alpha class in 1972 and the omega class in 1997. Beginning with the 1998-1999 academic year, all baccalaureate students following the RN-BSN curriculum were RN students with basic nursing education from a diploma or associate degree nursing program. Responding to the critical shortage of nurses and the need to retain nurses already in the profession, the District of Columbia Consortium for Nursing Education and Practice (DCCNEP) finalized an
inter-institutional DC Educational Articulation Plan in June 2001. In fall 2001, the UDC Practical Nursing Program was relocated to the Department of Nursing and Allied Health from continuing education. In fall 2002, the LPN to RN track within the associate degree program was initiated and graduated the first LPN to AASN class in May 2003.

In January 2009, under the leadership of Dr. Allen Sessions, its then-President, UDC announced its intention to create a community college. The Board of Trustees approved the creation of a new University system, which now includes the Community College. The generic AASN track and LPN-RN accelerated are now housed in the Community College.

The undergraduate program offers an exit point at the associate level where graduates become eligible to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN). After attaining registered nurse licensure, alumni have the option of entering the workforce and/or continuing their nursing education at the baccalaureate level.

ORGANIZATIONAL STRUCTURE

Nursing is administered by the Director of Nursing and reports to the Academic Dean of the Community College and to the Division Director of Nursing, Allied Health, Life and Physical Sciences. The organizational charts that follow indicate the organizational structure in the University (Academic Units), Community College, Division of Nursing, Allied Health, Life and Physical Sciences, and the AAS Nursing Program. For purposes of communication, nursing students are expected to follow the organizational structure starting at the level of the faculty member teaching a specific course and progressing up the chain of command.

II: MISSION AND VISION

Mission
The mission of the AAS Nursing Program is to prepare competent practitioners to meet health related needs of the diverse citizenry of the District of Columbia and the global society at large and to address health needs across the life span. Graduates can practice in a variety of settings, under a variety of conditions (including natural and man-made disasters). The mission embraces various levels of educational preparation for the nursing discipline. These programs enable graduates to achieve educational, career mobility and practice advancement.

Vision
The vision of the AAS Nursing Program is to provide a positive supportive learning environment where students acquire the necessary knowledge, skills, and professional values through evidence-based innovative instructions to become a safe and competent practitioner for direct client care to meet the diverse health care needs of our community.

III: PHILOSOPHY OF THE NURSING PROGRAM
The Associate of Applied Science in Nursing Program (“AAS Nursing Program”) embraces the missions and goals of UDC and UDC-CC. As a major component of this urban land-grant institution of higher education, the faculty has the responsibility to provide nursing education opportunities to D.C. residents and to promote life-long learning. The faculty believes that a well-prepared nursing workforce is required in order to be responsive to the health care market demands of the Washington, D.C. metropolitan area.

The faculty believes that the dynamic multidimensional health needs of a culturally diverse population requires its nursing students to be educated at various levels that span from basic entry level nursing programs to the doctoral degree. The AAS Nursing Program is the undergraduate nursing program at UDC-CC. At this level, students acquire the necessary knowledge and skills to become competent clinicians for direct client care through the roles of care provider, care manager, and member of the health team. These experiences may occur in a variety of structured settings. The AAS Nursing Program graduate is eligible to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN®). As an RN, the graduate can progress to an RN-BSN program.

The faculty believes nursing is an evidence-based discipline that incorporates professional nursing standards (American Nurses Association standards of practice and National Patient Safety Goals) and concepts (QSEN and NLN) to address individual, group, and community health care needs. The role of nursing encompasses specific competencies
necessary for the delivery of safe and effective care. Nurses collaborate within the clinical environment, interacting with effective oral and written communication skills to coordinate care excellence which considers ethical and legal implications of service.

Faculty believes that the outcomes of the nursing program must include general education competencies, end of program student learning outcomes, and program outcomes. These outcomes reflect the purposes and effectiveness of the AAS Nursing Program. Also, the outcomes help to evaluate the degree to which the Program is achieving its mission and goal:

- Licensure examination pass rates
- Program completion rates
- Job placement rates

The faculty believes that the role of nursing is consistent with the mission and philosophy of the University’s programs and core values. These core values are well defined in the mission statement of the NLN, the voice of nursing education. The core values of diversity, integrity, excellence, caring, and ethics provide a foundation for the concept-based curriculum framework. UDC-CC nursing students, upon program completion and appropriate licensure, become valuable members of the nursing profession as well as integral members of the interdisciplinary healthcare team.

IV: DESCRIPTION OF THE ORGANIZING CURRICULUM FRAMEWORK

The AAS Nursing Program’s organizing curriculum framework (formerly called the conceptual framework) identifies the major concepts, themes, and exemplary that organize the program’s curriculum (Ignatavicius, 2019, p. 8). The program’s organizing curriculum framework is comprised of NLN Core Values, QSEN Integrating Concepts, Programs Objectives, and Roles of Nursing. The framework forms the foundation for nursing and nursing education and serves as a guide for curriculum development, decision making, and as a resource to clarify and direct EPSLO

The Nursing Program educational curriculum is organized around the achievement of the EPSLOs with course-level outcomes for each course. Every course syllabus was shaped around the EPSLOs, which in turn were mapped to the CSLOs. The syllabi were developed using the College’s approved syllabus template to ensure consistency. For each EPSLO, the
mapped CSLOs will be evaluated to determine the degree to which student learning represented the various levels of difficulty as defined in Bloom’s Taxonomy. The objective of the analysis is to affirm a progression throughout the curriculum that enables students to demonstrate higher-order thinking skills.

The concept-based curriculum model was chosen to help the nursing program handle content saturation and provide a method for content management. Students will focus on generalities of the concepts and then apply what they have learned to specific priority exemplary. Concepts can be applied in a variety of clinical settings that will help utilize the current limited clinical sites and prepare graduates for a greater variety of positions given to the current job climate. A deeper understanding of the concepts will help promote the development of clinical judgment that is necessary for graduate nurses to function in the health care system (Giddens, 2016). This project builds on best practices from Jean Giddens’ work on concept-based curriculum (Giddens, 2016).

The concept-based curriculum correlates with the program’s philosophy, program learning outcomes, end-of-student learning outcomes, and organizing curriculum framework. Learning activities include lectures, audio/visual representations, case studies, interactive learning activities, simulation lab, and patient care clinical learning experiences, which will be hands-on and supervised by faculty.

Core Values (NLN):
Core values are defined as basic components of the overall nursing program and are discussed individually as follows:

CARING --- promoting health, healing, and hope in response to the human condition;
INTEGRITY --- respecting the dignity and moral wholeness of every person without conditions or limitation;
DIVERSITY --- affirming the uniqueness of and differences among persons, ideas, values, and ethnicities; and
EXCELLENCE --- co-creating and implementing transformative strategies with daring ingenuity.

CARING: A culture of caring, as a fundamental part of the nursing profession, characterizes our concern and consideration for the whole person, our commitment to the common good, and our outreach to those who are vulnerable. All organizational activities are managed in a
participative and person-centered way, demonstrating an ability to understand the needs of others and a commitment to act always in the best interests of all stakeholders (NLN, 2017).

**INTEGRITY:** A culture of integrity is evident when organizational principles of open communication, ethical decision-making, and humility are encouraged, expected, and demonstrated consistently. Not only is doing the right thing simply how we do business, but our actions reveal our commitment to truth telling and to how we always see ourselves from the perspective of others in a larger community (NLN, 2017).

**DIVERSITY:** A culture of inclusive excellence encompasses many identities, influenced by the intersections of race, ethnicity, gender, sexual orientation, socio-economic status, age, physical abilities, religious and political beliefs, or other ideologies. It also addresses behaviors across academic and health enterprises. Differences affect innovation, so we must work to understand both ourselves and one another. And by acknowledging the legitimacy of us all, we move beyond tolerance to celebrating the richness that differences bring forth (NLN, 2017).

**EXCELLENCE:** A culture of excellence reflects a commitment to continuous growth, improvement, and understanding. It is a culture where transformation is embraced, and the status quo and mediocrity are not tolerated (NLN, 2017).

**ETHICS:** Nursing values are enduring beliefs, attributes, or ideals that establish moral boundaries of what is right and wrong in thought, judgment, character, attitude, and behavior and that form a foundation for decision making throughout life. These include honesty, integrity, dignity, and respect. Nursing values are what determine professional standards and practices as well as the America Nurses Association Code for Nurses. Nursing values are the values shared within the nursing profession which identify the practice of nursing (NLN, 2017).
V: ASSOCIATE OF APPLIED SCIENCE IN NURSING PROGRAM OUTCOMES

Performance on Licensure exam. The first-time pass rate will be at least 80% during the same 12-month period.

Program completion. 60% of students in each cohort by program option will graduate within 150% of length of program after enrollment in the first nursing course.

Job placement rates. 80% of all graduates are employed in a position requiring an RN license within 1 year of program completion.
VI: AASN END-OF-PROGRAM STUDENT LEARNING OUTCOMES (SLOS)

UDC-CC Student Learning Outcomes Aligned with AASN End-of-Program Student Learning Outcomes

<table>

<td></td>
</tr>
<tr>
<td>8. To live as a global citizen by embracing diversity in every area of personal and professional life.</td>
<td></td>
</tr>
</tbody>
</table>

VII: QSEN STANDARDS

The AAS Nursing Program is organized around the Quality and Safety Education for Nurses (QSEN) project, which addresses the challenge of preparing future nurses with the knowledge, skills, and attitudes (KSAs) necessary to continuously improve the quality and safety of the healthcare systems within which they work. QSEN defines the quality and safety competencies for nursing and proposed targets for the KSAs to be developed in nursing pre-licensure programs for each competency: patient-centered care, teamwork and collaboration, evidence-based practice, quality improvement, safety, and informatics.
PATIENT-CENTERED CARE: Recognize the patient or designee as the source of control and full partner in providing compassionate and coordinated care based on respect for patient’s preferences, values, and needs.

TEAMWORK AND COLLABORATION: Function effectively within nursing and inter-professional teams, fostering open communication, mutual respect, and shared decision-making to achieve quality patient care.

EVIDENCE-BASED PRACTICE: Integrate best current evidence with clinical expertise and patient/family preferences and values for delivery of optimal health care.

QUALITY IMPROVEMENT: Use data to monitor the outcomes of care processes and use improvement methods to design and test changes to continuously improve the quality and safety of health care systems.

SAFETY: Minimizes risk of harm to patients and providers through both system effectiveness and individual performance.

INFORMATICS: Use information and technology to communicate, manage knowledge, mitigate error, and support decision making.

VIII: PROGRAM OF STUDY

Faculty plan, implement, and evaluate both clinical and didactic learning experiences that are sequenced appropriately, kept current, and are attainable with a time frame of two calendar years. The UDC-CC’s AAS Nursing Program length of time and the credit hours required to complete the UDC-CC AAS Nursing Program with the attainment of identified end-of-program student learning outcomes and program outcomes are consistent with ACEN Standard 4.8. The curriculum has been developed by the faculty and is regularly reviewed to ensure integrity, rigor, and currency (ACEN Standard 4.3).

The curriculum is based on sound educational principles and follows the philosophy/mission and objectives/outcomes identified for the program and for the students. The end-of-program student learning outcomes are used to organize the curriculum, guide the delivery of instruction, direct learning activities, and evaluate student progress (ACEN Standard 4.2). The program of study prepares students to practice according to the Washington DC Board of Nursing Rules and Regulations. The curriculum teaches students to use safe patient care and systematic clinical decision making.

The IOM (2011) summarized the current problem facing nursing faculty with regards to nursing education: “The explosion of knowledge and decision-science technology also is changing the way health professional access, process, and use information. No longer is rote memorization an option. There simply are to enough hours in the day or years in an undergraduate program to continue compressing all available information into the curriculum.” There is too much knowledge, too little time, not enough clinical space, and a limited number of faculty to continue teaching nursing using the current curriculum model.
The IOM (2011) stated, “New approaches must be developed for evaluating curricula and presenting fundamental concepts that can be applied in many different situations rather than requiring students to memorize different lists of facts and information for each situation”.

To address this issue, the UDC-CC AAS Nursing Program has decided to develop a concept-based curriculum. The concept-based curriculum approach was chosen to help nursing programs handle content saturation and provide a method for content management. Students focus on generalities of the concepts and then apply what they have learned to specific priority exemplary. Concepts can be applied in a variety of clinical settings that will help utilize the current limited clinical sites and prepare graduates for a greater variety of positions given to current job climate. Deeper understanding of the concepts will help promote development of clinical judgement that is necessary for graduate nurses to function in the health care system (Giddens, 2013). This project builds on best practices from Jean Giddens’ work on concept-based curriculum (Giddens, 2007).

The change to a concept-based curriculum correlates with the Program’s philosophy, program learning outcomes, student learning outcomes, and conceptual framework. UDC-CC faculty ensure that the revisions fully address the Institute of Medicine (IOM) and QSEN competencies.

Learning activities include lectures, audio/visual representations, case studies, interactive learning activities, simulation lab, and patient care clinical learning experiences which are hands on and supervised by faculty.
DIVISION OF NURSING, ALLIED HEALTH, LIFE AND PHYSICAL SCIENCES
Associate of Applied Science in Nursing (AASN)

Effective Fall 2019

Revised/AASN handbook/August 2019
Nursing courses are: Foundations of Nursing, Common Concepts of Adult I, Common Concepts of Adult I Simulation Lab, Mental Health Nursing, Maternal-Newborn Nursing, Nursing Care of Child, Nursing Pharmacology, Complex Concepts of Adults II, Complex Concepts Simulation Lab, and Nursing Seminar AAS. The curriculum provides continuity, sequence and integration of learning. The structure fosters promotion, prevention, rehabilitation, maintenance, and restoration of the health of individuals of all ages.

The contents of each course will meet the role expectations of our graduates, which are professional values, ethics and safety, diversity, and confidentiality issues. Courses will address The Nurse Practice Act, Standards of Nursing Practice, Unprofessional Conduct Rules and Delegation. Also, graduates will learn in the curriculum about cultural, ethnic, and socially diverse concepts that are driven by local, national, and global issues.

The learning experiences are progressive; the didactic and clinical portions are concurrent. Students have sufficient clinical experiences to foster communication and interpersonal relationship skills. Students participate in clinical experiences that are evidence-based and reflect contemporary practice and nationally established patient health and safety goals (ACEN Standard 4.10). Students will be able to meet stated student and program outcomes, including safe practice in contemporary health care environments. Practice learning environments are appropriate for student learning and support the achievement of the end-of-program student learning and program outcomes (ACEN, Standard 4.9).

**IX: ADMISSION, PROGRESSION, AND GRADUATION**

The Associate of Applied Science in Nursing (AASN) prepares graduates to take the National Council Licensure Examination-RN (NCLEX-RN), which upon successful passage allows one to practice as a Registered Nurse in the United States and its territories.

**PRE-NURSING APPLICATION**

Potential students must be enrollees at the University or Community College prior to admission to the nursing program. The Community College Admissions office processes applications to the Community College. Admission into the College does not guarantee admission into the AAS Nursing Program. Admission is competitive and limited to available resources. Students who are not accepted must reapply for admission consideration. Students should complete the General Education Requirements with a UDC-CC grade point average of 3.0 or better on the 14 credit hours of the nursing courses listed on the Nursing Program of Study by enrollment or documentation of transfer credit. The courses are:

**Total** 14 Credit Hours
ADMISSION TO THE NURSING PROGRAM

The Admission, Progression, and Graduation (APG) Committee evaluates all nursing applications. Applications to the nursing program must be completed and submitted by the posted deadline. The APG Committee verifies completion of pre-requisites and all admission requirements. The APG Committee assesses students according to criteria and assigns points for grade point average and application components (demographic information, application-essay quality, recommendations, and admission examination performance). Recommendations are forwarded to faculty and the Director of Nursing (DON). Applicants are notified in writing of the decision by the DON regarding admission status. Eligibility criteria for program admission include but are not limited to the following minimum requirements:

1. Cumulative Grade Point Average of 3.0 or greater.
2. Completion of all pre-requisite courses with a grade of at least a "C."
3. Completion of required science courses within five years of admission.
4. Satisfactory professional recommendations (i.e., employer, manager, professor).
5. National Criminal Background Clearance.
6. Students may only have one (1) repeat in any science course.
7. Completed application and essay received on or before the deadline.
8. Valid CPR (Healthcare Provider) certification from the American Heart Association.
9. Successful completion of a standardized admission examination for Generic.
10. Mandatory student interview.

Students are informed in writing of their application status. Selected students are given detailed information on requirements for progression. Accepted students must verify completion of the following requirements prior to agency assignments (a component of all nursing practicum courses):

1. Acknowledge intent to enroll in writing.
2. Valid UDC Student Picture Identification.
3. Proof of purchase of professional liability insurance.
4. Health clearance by University Health Services.
5. Drug screening if requested.

Students who are denied admission to the nursing program are informed and assisted to explore other career options or may reapply during the next application cycle. Applications of those not admitted are not retained.

TRANSFER STUDENTS

As is UDC policy, the academic unit of an applicant's major reserves the right to assess undergraduate transfer credits that count toward a specified degree. In nursing, the APG Committee reviews and evaluates all transfer credits applicable to a nursing major. The Director of Nursing (DON) and APG Committee indicates which courses the student must complete to fulfill degree requirements. UDC confers degrees to those students who complete all degree requirements according to the nursing program of study. Acceptance of transfer students from other nursing programs depends on space availability.

Transfer students must submit their official transcript for evaluation by the University prior to their application to the Nursing Program. The evaluation, defined on the Transfer Student Evaluation Data form, provides information used by faculty in counseling.
students. Licensed Practical Nurses and other health care providers as approved by the DON and the APG Committee may receive advanced placement. See guidelines under Credit by Examination.

Transfer students from other undergraduate nursing programs must submit a letter from the Director of their previous nursing program validating good academic standing and eligibility for re-admission to the Program. Students must be enrolled in UDC for at least one semester, meet criteria for admission and have earned a 3.0 or higher cumulative GPA to be considered for admission into the AAS Nursing Program. Nursing courses may be considered based on faculty evaluation of the university catalog, prior course syllabus, and acceptable performance in the clinical skills evaluation that is within one-year limitation. Consideration for advancement into the program is based on space availability. Science courses can be no older than seven years from the time of admission to the AAS Nursing Program.
RN SEEKING COLLEGE CREDIT FOR ASSOCIATE DEGREE

A US licensed RN seeking equivalent college credits for the Associate Degree may be required to complete a standardized specialty exam for each course and show clinical competency by documented practice hours and/or skills demonstration. US RNs will be exempt from the NURS-232C Complex Concepts of Simulation Lab. Non-US Licensed RNs will be required to take NURS-232C Complex Concepts of Simulation Lab. In addition, the program of study must be satisfied.

CREDIT BY EXAMINATION (GENERAL GUIDELINES FOR UNIVERSITY COURSES)

The faculty is committed to validating prior education through the credit by examination process to facilitate advanced placement of students. Students may receive credit by examination for specific courses with approval of the department offering the course in keeping with university policies.

Students may receive credit for course work upon successful completion of an examination and approval of the director of nursing and dean. Students seeking credit by examination or other course equivalence must receive prior permission from the director of nursing. Once the appropriate forms are completed and signed, full-time students must pay the per credit hour fee. Part-time students must pay any additional tuition and pay the per credit hour fee.

CREDIT BY EXAMINATION FOR NURSING COURSES

The University policy for the Credit by Examination must be followed. The additional guidelines for challenging nursing courses through the Credit by Examination process have been developed to facilitate smooth progression for nursing students:

1. Student must follow the procedure for Credit by Examination according to University guidelines as well as the nursing program of study to avoid problems with faulty sequencing of courses, omissions, or duplications in completing the program of study.
2. Eligibility for the Credit by Examination process includes District of Columbia Registered Nurses and Licensed Practical Nurses presently enrolled in the nursing program at this University.
3. Licensed Practical Nurse (LPN) students must have a completed Nursing application on file and have a NRTC declared major. The LPN must have graduated from a Board of Nursing approved LPN program and hold a current LPN license.
4. Individualized advisement will be completed by the Nursing Faculty Advisor to determine the most appropriate options for each student.
5. Students will meet with the instructor of the course to discuss the requirements and receive detailed instructions with information sheets to assist in completion of the Credit by Examination process.
6. If a student decides to do Credit by Examination, an examination fee is charged. This fee is charged to any student seeking examinations in lieu of enrollment in specific courses. Once permission has been obtained from the faculty and the Director of Nursing, current Credit by Examination fee per course credit hour, plus the tuition, will be charged. The examination cannot be administered prior to payment of the fee. Tuition is required after successful completion of the Credit by Examination for all students except the LPN Students who have completed the Validation Theory/Lab Course.
GRADUATED STUDENTS RETURNING FOR NCLEX-RN BOARD APPLICATIONS

Graduated students who have completed AAS Nursing Program course requirements from the UDC-CC AAS Nursing Program, but have not taken or passed the NCLEX-RN exam within 60 days of graduation must meet one of the two remediation requirement options to be able to take the NCLEX-RN board exam under the AASN code:

COMPETENCY REMEDIATION OPTION 1

Student must:

1. Complete Adaptive quizzing to the highest mastery level (level 3) for each nursing course;
2. Pass the NURS-232C Complex Concepts Simulation Lab course that includes passing the final comprehensive standardized exam at the current AAS Nursing program benchmark; and
3. Complete the acceptable NCLEX-RN review course: Kaplan, Hurst, or NCSBN, or U-world.

COMPETENCY REMEDIATION OPTION 2

Student must:

1. Take and pass the Complex Concept of Adults II Nursing theory/practicum course;
2. Complete Adaptive quizzing to the highest mastery level (level 3) for each nursing course;
   3. Take and pass the NURS-232C Complex Concepts Simulation Lab course that includes passing the final comprehensive standardized exam at the current AAS Nursing Program benchmark; and
   4. Complete the acceptable NCLEX-RN review course: Kaplan, Hurst, or NCSBN, or U-world.

Students waiting more than 60 days (2 months) to register for the NCLEX-RN® will have to show proof of a current review class within the last thirty days, in order to have their application approved by the Director of Nursing.

NURSING APPLICATION PROCESS FOR LICENSED PRACTICAL NURSE (LPN) STUDENTS FOR THE ACCELERATED PROGRAM

Licensed Practical Nurse (LPN) / Licensed Vocational Nurse (LVN) Students must have completed all pre-requisites with a grade of "C" or higher and have a cumulative GPA (CGPA) of 3.0 or higher at UDC. Those students who enter the University during the spring semester have until the end of the spring semester to meet the CGPA requirement. Those students who enter during the fall semester have until the end of fall semester to meet the CGPA requirement.

LPN Students who are enrolled in the LPN Validation Courses (Theory and Laboratory) according to the District of Columbia Consortium for Nursing Education and Practice Articulation Model can apply for admission to the LPN-RN accelerated program. Enrollment in the Validation Courses does not guarantee admission to the AAS Nursing Program at UDC.
LPNs in the validation course that have one failure, or one withdrawal will be recommended to apply to a generic AAS Nursing Program. LPN students who fail or withdraw the second time will not be allowed to continue in the accelerated LPN to RN track.

LPN students must meet the minimum requirements for the AAS Nursing Program admission. Accepted students must complete the following requirements prior to clinical agency assignments:

1. UDC Student Picture Identification.
2. Valid Licensed Practical Nurse (LPN).
4. Obtain health clearance through the University Health Services prior to the first day of class.
5. Obtain national criminal background clearance.
6. Attend interview as scheduled.
7. All validation students are required to take a standardized exam at the completion of the LPN Validation Course. To be eligible for admission into the UDC-CC’s AAS Nursing Program students must pass the Kaplan LPN Validation Exam.

ADVISEMENT AND REGISTRATION

New students (Freshman Level or Transfer) admitted to the University who indicate an interest in nursing should report to the Student Success Center for advisement. Nursing students are assigned to faculty advisors according to the first letter of the student’s last name. They are to see their assigned advisor during the designated academic advisement period each semester. Students should make appointments with their faculty advisor for academic counseling at least once per semester to facilitate optimal progression through the program and to remove the advisor hold. Students must be accepted as nursing majors or have permission to register for AASN or NURS courses at the community college.

CLASS ATTENDANCE POLICY

The University expects all students to attend all scheduled sessions on a regular basis. Poor attendance in theory class will inhibit students’ ability to meet learning objectives in the clinical setting. Poor attendance is defined as more than two absences in a theory class. If a student finds it necessary to be absent from class because of illness or other personal reasons, the reason for the absence should be reported to the instructor. This is for the instructor’s information only and in no way excuses the absence, nor does it relieve the student of the responsibility for assignments covered during the period of absence. Extenuating circumstances that may force a student to have an extended absence should be documented and reported to the instructor and director of nursing. The instructor will determine the amount of assistance a student will need to complete the course requirements.

Students are expected to attend all learning experiences to successfully attain the course objectives. Each course syllabus explains attendance policies unique to that specific nursing course. All labs and clinical experiences require mandatory attendance. Only labs and clinical with appropriate documentation and instructor permission can be made up.

X: PROGRESSION, WITHDRAWAL, DISMISSAL AND READMISSION

PROGRESSION

Nursing students are eligible for progression upon meeting the following contingencies:

1. Achievement of a grade of "77" or better is required in all nursing courses listed on the Program of Study and a 2.8 GPA must be maintained.
2. Incomplete grade(s) must be removed before progressing to another nursing course.
3. Pre and/or co-requisites must be completed for each nursing course prior to progression.
4. Only one nursing course may be repeated throughout the life of the program.
5. Once admitted to the nursing program, generic students have a maximum of three years to complete degree requirements.
6. Once admitted to the nursing program, accelerated LPN—RN students have a maximum of two years to complete degree requirements.

WITHDRAWAL

Students will be limited to only one withdrawal throughout the program. Any student who withdraws more than once will be dismissed from the program.
GRADING SYSTEM

The following grades are used in all nursing courses to indicate level of achievement:

A    (93-100)   Excellent (Passing)
B    (85-92)    Good (Passing)
C    (77-84)    Satisfactory (Passing)
D    (69-76)    Unsatisfactory (not passing)
F    (Below 68) Unsatisfactory (not passing)

CONSORTIUM OF UNIVERSITIES

Students enrolled at UDC may be eligible to take courses at any of the consortium member institutions. Courses taken through the consortium must be degree-related and not offered in the given semester at UDC. Students are limited to six (6) hours per semester through the consortium. Eligible students in associate programs should have completed 30 semester hours.

To be eligible for participation in the consortium, a student must:
1. Be currently enrolled in a degree-granting Department at UDC.
2. Have approval from a major department chair and the dean.
3. Be in good academic standing with a cumulative GPA of 2.75.
4. Be in good financial standing at the University of the District of Columbia UDC.

Registration forms and instructions are available from the University Consortium Registration Coordinator, who is in the Office of the Registrar. The student must pay UDC tuition and fees for the current semester before becoming eligible to attend institutions in the consortium. Official registration in UDC is a prerequisite for the consortium registration.

If course requirements cannot be met at UDC and students find it necessary to take courses at another university, they must first obtain written permission. The Consortium form is obtained from the Registrar’s Office and signed by Director of Nursing and the Academic Dean of the College and returned to the Registrar’s Office.
DISMISSAL

The following behaviors will result in dismissal of students from the Nursing Program:

1. **A grade of C or better is required of ALL courses listed on the program of study. Only one opportunity is given to repeat a nursing course for progression.**

2. Students whose transcripts show two grades below "C," either D or F, in nursing courses will not be retained in the nursing major.

3. Students will be limited to only one withdrawal throughout the program. Any student who withdraws more than two times will be dismissed from the program.

4. **Any verified instance of cheating or academic dishonesty.**

5. Any unethical practices in classroom, lab, or clinical settings.

6. Any incident where continuing in the program would be detrimental to the health of the student or to others.

While a student is dismissed from the AAS Nursing Program, they are not dismissed from UDC and are assisted to identify another major. In some cases, a student may be readmitted to the AAS Nursing Program upon recommendations from the Admission, Progression, and Graduation Committee (APG Committee).

READMISSION

1. Students in good academic standing, who have not been enrolled for one or more semesters in the AAS Nursing Program, must submit a letter of intention by the 3rd Friday in January for consideration for the following fall term and the 3rd Friday in September for the following spring term in order to be screened for eligibility to register for nursing courses.

2. Students who withdraw from the AAS Nursing Program and apply for readmission at a later date, even though the student has earned a "C" grade in nursing courses during a previous enrollment, may be asked to repeat some or all of the nursing courses previously completed, especially if the time period between withdrawal and readmission is one year or longer.

3. Any student in the nursing program who has a break in their program of study must demonstrate **clinical competencies** beginning with the Foundations of Nursing skills up to and including the last clinical course that the student was enrolled.

4. Readmission of nursing students is contingent upon recommendations of the APG Committee and space availability. If a student is readmitted, he/she will be readmitted on space availability under the current curriculum plan.
REQUIREMENTS FOR GRADUATION

DEGREE REQUIREMENTS

1. The Associate Degree requires a minimum of 66-67 semester hours, 15 of which must be in residence.
2. Completion of appropriate University-Wide requirements. (Refer to University Catalog).
3. Completion of all courses on the program of study with a minimum grade of "C."
4. A 2.8 grade point average must be maintained.

AAS NURSING REQUIREMENTS

Completion of the Program of Study requires that the student completes NURS-232C Complex Concepts Simulation Lab and pass its comprehensive standardized exit exam at a current determined benchmark (a score predicted of passing the NCLEX-RN at the first sitting). In addition, by the end of the AASN courses, students are required to complete a minimum of 10,000 NCLEX-RN style questions.
COMMENCEMENT

Nursing majors must meet UDC graduation clearance requirements. Students will not be recommended to participate in Commencement related activities unless all graduation clearance requirements have been met.

AAS Nursing Program Pinning Ceremony Policy

The pinning ceremony planning and execution shall fall under the AAS Nursing Program. The Nursing Director and Student Nurses Association (SNA) faculty advisor will receive student input from the student body of the graduating class regarding the planning of the pinning ceremony. The Director of Nursing and SNA faculty advisor shall oversee all final decisions, and aspects of the Pinning Ceremony. The nursing students participating in the Pinning Ceremony must have successfully completed the AAS Nursing Program and be eligible to take the NCLEX-RN. Graduation clearance fee must be paid by the date identified each semester.

The "Nightingale Pledge"

I solemnly pledge myself before God and in the presence of this assembly, to pass my life in purity and to practice my profession faithfully. I will abstain from whatever is deleterious and mischievous and will not take or knowingly administer any harmful drug. I will do all in my power to maintain and elevate the standard of my profession and will hold in confidence all personal matters committed to my keeping and all family affairs coming to my knowledge in the practice of my calling. With loyalty will I endeavor to aid the physician, in his work, and devote myself to the welfare of those committed to my care?

The Nightingale Pledge was composed by Lystra Gretter, an instructor of nursing at the old Harper Hospital in Detroit, Michigan, and was first used by its graduating class in the spring of 1893.

ACADEMIC INTEGRITY

HONESTY

Students enrolling at UDC assume the obligation to maintain standards of academic integrity. Violation of academic obligations includes: unethical practices and acts of academic dishonesty, such as cheating, plagiarism, falsification, and the facilitation of such acts. Cheating includes the actual giving or receiving of any unauthorized aid or assistance or the actual giving or receiving of any unfair advantage on any form of academic work. Plagiarism is the use of another’s ideas or words, or both, as if they were one’s own. However, ideas or direct quotations from others are acceptable with appropriate citation of source. Students are subject to dismissal from a degree program for unethical practices and acts of academic dishonesty. It should also be stated that a plea of ignorance of the policy will not be accepted. The actions prescribed whenever a violation of academic integrity is noted begin with the instructor’s written report documenting the academic offense and if it is determined that a student has violated the Academic Integrity
Policy, the academic dean may suspend the student from the University. (See University Catalog).

Academic honesty is expected and required for retention in the AAS Nursing Program. Students who do not demonstrate academic honesty will be dealt with according to the following policy:

Any student found to be dishonest based on concrete evidence on exams, course, or clinical work; will be dismissed from the nursing program. Reasons for dismissal will be a part of the student's nursing record. Any student who is found cheating will not receive credit for the course or clinical lecture, laboratory, or practicum work.

**CODE OF CONDUCT AND DISCIPLINARY STANDARDS**

All students majoring in nursing at UDC-CC will be expected to follow a code of conduct consistent with the high standards established and practiced within the nursing and health science professions. Certain types of behavior have been identified as causes for dismissal from the AAS Nursing Program if practiced by nursing students. These include:

1. Dishonesty, such as cheating, plagiarism, or knowingly furnishing false information to the University.
2. Forgery, alteration, or misuse of University documents, records or identification.
3. Violation of any law of the land.
4. Disruption of class by use of abusive or obscene language.
5. Insubordination.
6. Fighting at a clinical site or on university premises.
7. Being intoxicated or under the influence of illegal drugs while on clinical assignment or university premises.
8. Vandalism or stealing.
9. Sleeping while on duty at a clinical assignment.
10. Leaving a clinical assignment or room/area without the instructor's permission.
11. Failure to notify the designated clinical personnel of absence or lateness.
12. Violation of any duly established rules and/or regulations.
13. Falsifying or altering documents such as CPR cards.

Note that if for any reason a clinical agency decides that a student cannot participate in clinical rotation in their facility, the AAS Nursing Program will not be held responsible.
AMERICAN NURSE’S ASSOCIATION CODE OF ETHICS

Students are expected to follow the Code of Ethics as adopted by the American Nursing Association. The Code of Ethics serves as a guide by which nursing students may evaluate their professional conduct as it relates to health care consumers and other members of the health team. The Code of Ethics is discussed in the Foundations of Nursing courses.

Provision 1: Respect for Others
The nurse practices with compassion and respect for the inherent dignity, worth, and unique attributes of every person.

Provision 2: Commitment to the Patient
The nurse’s primary commitment is to the patient, whether an individual, family, group, community, or population.

Provision 3: Advocacy for the Patient
The nurse promotes, advocates for, and protects the rights, health and safety of the patient.

Provision 4: Accountability
The nurse has authority, accountability, and responsibility for nursing practice; makes decisions; and takes action consistent with the obligation to promote health and to provide optimal care.

Provision 5: Duty to Self and Duty to Others
The nurse owes the same duties to self as to others, including the responsibility to promote health and safety, preserve wholeness of character and integrity, maintain competence, and continue personal and professional growth.

Provision 6: Contribution to Healthcare Environments
The nurse, through individual and collective effort, establishes, maintains and improves the ethical environment of the work setting and conditions of employment that are conducive to safe, quality health care.

Provision 7: Advancement of the Nursing Profession
The nurse, in all roles and settings, advances the profession through research and scholarly inquiry, professional standards development, and the generation of both nursing and health policy.

Provision 8: Promotion of Community and World Health
The nurse collaborates with other health professionals and the public to protect human rights, promote health diplomacy, and reduce health disparities.

Provision 9: Promotion of the Nursing Profession
The profession of nursing, collectively through its professional organizations, must articulate nursing values, maintain the integrity of the profession, and integrate principles of social justice into nursing and health policy.
Health Information Portability and Accountability Act (HIPAA)
All laboratory scenarios (i.e. SimMan, Nursing Anne, SimMom, SimJunior, SimBaby), shall not be discussed outside of the lab setting without the instructor(s) permission. This violation can result in grounds for dismissal from the nursing program.

XI: GENERAL INFORMATION

STUDENT EXPENSES (Subject to change and are estimated figures)

1. Required university fees and tuition as designed in the UDC class schedule.
2. Textbooks, Uniform, CPR, and equipment.
3. Transportation to and from clinical experiences (carpool encouraged).
4. Meals, locker fees, and parking facilities as determined by the specific agency to which the student is assigned.
5. Standardized Nursing Examination fees each semester, diagnostic, and exit exam.
6. Learning resources (review materials).
7. Student Nurses' Association membership dues.
8. School pin, upon completion of requirements for graduation.
9. National Criminal Background Clearance (prior to being admitted to the nursing program and yearly).
11. Liability Insurance (currently covered in university fees)

HEALTH REQUIREMENTS

Health clearances are required for all students before being assigned to lab and clinicals. Students are required to obtain forms from the UDC Health Services to be completed by private physician or health care provider and must return completed forms to the UDC Health Services to receive health clearance at the following location:

Building 44, Room A40 Telephone (202) 274-5030

Students are urged to initiate health clearance approximately two months prior to the beginning of the fall and spring semesters. All students under the age of 27 are required to show proof of immunizations against measles, mumps, rubella, tetanus, diphtheria, and Hepatitis B. Students under the age of 19 are additionally required to show proof of immunization against polio. Note that Clinical agency sometimes require drug test, flu and other vaccinations therefore; students must comply with their request.

Health problems and/or pregnancy, which would interfere with the student’s ability to meet program objectives, will be considered on an individual basis. Student with health problems and/or pregnancy must have written permission from their physician and sign a student release form prior to clinical laboratory and classroom experiences. Specific agency health policies must be observed. Students are required to sign a Student Release Form. This form includes the following statement:

I hereby release the Nursing Program and the University of the District of Columbia Community College from responsibility for any injury or illness to me.
(or if I am pregnant, my unborn fetus) while attending hospital or other clinical settings. I understand that risks do exist for me (and if pregnant, my unborn fetus) while practicing nursing in the hospital or other clinical settings and I do assume all risks involved.

ACCIDENTS AND ILLNESS INCLUDING COMMUNICABLE DISEASES

In the event a student is unable to attend a clinical assignment because he/she is ill the absences are excused. However, the student is still held accountable for all competencies included in the clinical education course in which the student is enrolled.

Some of the more common infectious diseases (which may be updated) and diseases designated as requiring notifiable reporting to the Centers for Disease Control and Prevention are listed below:

1. Acquired immune deficiency Syndrome (AIDS)
2. Amebiasis
3. Anthrax
4. Chickenpox
5. Diphtheria
6. Encephalitis
7. Gonorrhea
8. German measles (Rubella)
9. Haemophilus Influenza
10. Hepatitis
11. Malaria
12. Measles
13. Mumps
14. Pertussis
15. Plague
16. Poliomyelitis
17. Rheumatic fever
18. Rocky Mountain Spotted Fever
19. Salmonellosis
20. Smallpox
21. Syphilis
22. Tetanus
23. Toxic Shock Syndrome
24. Trichinosis
25. Tuberculosis
26. Tularemia
27. Typhoid fever
28. Yellow fever
CARDIOPULMONARY RESUSCITATION (CPR) CERTIFICATION
Each student without exception, enrolled in a clinical nursing course (practicum) is **required** to have current American Heart Association certification. The American Heart Association includes the BLS for Healthcare Providers (CPR & AED), including the Adult, Child, and Infant.

LIABILITY INSURANCE REQUIREMENT
All nursing students enrolled in clinical nursing courses must subscribe to the liability insurance program selected by the university. A group “blanket” liability insurance policy is provided with cost covered by nursing course lab fee.

NATIONAL CRIMINAL BACKGROUND CLEARANCE
Students are required to have a national criminal background clearance as part of program entrance requirement. Students are required to submit the background clearance. The student is required to update their background clearance annually from the date of the original clearance. If the school/clinical agency denies placement for a student because of the background clearance, that student may not be able to complete the clinical program. It is the student’s responsibility to contact the appropriate authorities to address and remove any citation on the report. The student may not return to clinical or the program until appropriate action has been taken.
UNIFORM REQUIREMENTS

Nursing students are required to wear uniforms specified by the AAS Nursing Program. Students are responsible for purchasing and maintaining their uniforms. A nametag must be worn on the uniform always. While in uniform, the following are appropriate and required:

1. Conservative hairstyle (hair above the uniform collar and off the neck).
2. Absence of or light use of make-up.
3. Absence of nail extensions or artificial nails.
4. Absence of perfume and/or cologne.
5. The minimum length of uniform dresses is mid-patella. The uniform is available in dress or pantsuit styles. Where uniforms are not required, students are expected to wear laboratory coats and/or modest street clothes (mid-patella dress, mid-patella skirt and blouse, shirt and slacks, or suit). Showing cleavage is not appropriate, no leggings, high-heels, scarf, jewelry, or body piercing. No head gear except for religious requirements.
6. White nurse's shoes (closed toe and heel). No athletic, sandals, canvas, or tennis shoes.
7. Some clinical facilities might have their dress code and student must comply.

Good personal hygiene, clean clothing, and polished shoes are essential. The sweater (optional) must be removed when providing direct patient care. The instructor reserves the right to evaluate personal appearance and behavior of the student and advise the student accordingly.
LABORATORY/CLINICAL ATTIRE

1. Laboratory coat (white, full length, long sleeves).
2. Name pin, white background with black lettering - full name, UDC-CC Nursing Student, not larger than 1 x 3 inches.
3. Nursing Program patch (obtained from the university bookstore) attached to the left sleeve of the laboratory coat and/or uniform one inch below the shoulder seam.
4. Pen with black ink.
5. Penlight/flashlight (AA or AAA model).
6. Pocket size notebook or pad of paper.
7. Scissors (bandage type).
8. Stethoscope with dual chest-piece (bell and diaphragm in adult and pediatric sizes).
9. Blood Pressure Cuff
10. White nurse’s shoes (closed toe and heel). No athletic, sandals, canvas, or tennis shoes.
11. Wristwatch with second hand (preferable with flexible band and waterproof features).
12. Jewelry permitted includes a wedding band and one pair of 8mm or less stud earrings.
13. Optional accessories - Cardigan sweaters (white or navy blue).

FEMALE NURSING STUDENT UNIFORMS

1. Official student AASN Nursing Program uniform with the program patch attached and name pin.
2. White support hose and undergarments.
3. Pregnant students may wear maternity student uniform or white maternity uniform with accessories as indicated.

MALE NURSING STUDENT UNIFORMS

1. White uniform shirts or uniform jackets with nursing patch and name pin attached.
2. White uniform pants or slacks.
3. White socks and undergarments.

CLASSROOM, LABORATORY AND CLINICAL EXPECTATIONS

CLASSROOM AND LABORATORY EXPECTATIONS

1. **Attendance:** To meet the course objectives, students are expected to attend class and all planned learning experiences whether on campus or off campus. Absenteeism jeopardizes academic success. Students who have two lab absences would not have met the course requirement.
2. **Children**: To provide an optimal learning environment, children are not allowed either in the classroom and laboratory sessions.

3. **Eating and Smoking**: Eating and smoking are **not** permitted in the classrooms or laboratories.

4. **Inappropriate Behavior**: Use of profanity, disrupting course settings or laboratory use by others with outbursts or verbal threats, irresponsible statements and remarks, or slanderous comments are **unacceptable**. These behaviors may result in removal from the course, classroom, or laboratory and may result in dismissal from the nursing program.

5. **Weapons**: Actual or potentially hazardous objects (guns, knives, sharp objects, etc.) are **not** allowed in the classroom or laboratory.

6. **Electronic Devices**: Permission for use of tape recorders and digital equipment in campus classrooms and laboratories may be discussed with the faculty member and used only with permission of that faculty member in that course. In the classroom, cell phones must be placed in silent mode. **Any device that disrupts class is not permitted in the classroom or laboratory.**

7. **Computer and skills/technology laboratory**: guidelines are posted and the Laboratory Coordinator addresses laboratory concerns.

8. **Referrals**: Students referred to the laboratories for specific enhancement and/or remediations are to make appointments with the Laboratory Coordinator for assistance.

9. **Attire**: In the classroom setting students must wear business casual attire with their ID badges always.

**CLINICAL/NURSING SKILLS LAB EXPECTATIONS**

The student must meet clinical objectives to successfully complete the clinical nursing courses:

1. **Length of Clinical Experiences**: The specific days and hours for the clinical nursing experiences vary with the course and the agency providing the nursing experience. Information regarding individual schedules will be given at the beginning of each course. Campus laboratory sessions are mandatory.

2. **Relationships**: Students will be responsible primarily to the UDC nursing instructor and secondarily to nursing service employees at the institutions providing the clinical experiences. Students are responsible for reporting significant information to the appropriate person at the clinical sites.

3. **Clinical Agency Policies and Procedures**: Students are required to attend orientations to the clinical agencies and must complete designated training for fire, evacuation, safety, and infection control.

4. **Professional Responsibilities**: Students are expected to comport themselves as novice professionals always and to function as accountable, responsible, and self-directed individuals.

5. **Attendance and Promptness**: Clinical participation and attendance are mandatory. Students are expected to be present and punctual for clinical. Failure to do so precludes the student's ability to meet clinical objectives.
Students arriving late to clinical ten (10) minutes or more after starting time will be sent home by the clinical instructor, and the student will be marked absent for that clinical day. Students who have two clinical absences would not have met the course requirement.

6. **Confidentiality**: Information and experiences relative to clients, patients, resident, and personnel in the agency are to be held in strict confidence. Discussion of experiences is limited to individuals involved in care. Health Insurance Portability and Accountability Act 1996 guidelines are to be followed.

7. **Unprofessional Behavior**: Use of profanity, disrupting course settings with outburst or verbal threats, irresponsible statements and remarks, or slanderous comments are unacceptable. These behaviors may result in removal from the clinical site and dismissal from the AASN Nursing Program.

8. **Unsafe Behavior**: Substance abuse (alcohol, illegal drugs and chemicals), unethic nursing actions, and/or sleeping on duty are grounds for immediate dismissal from the clinical site and the AASN Nursing Program. These actions seriously jeopardize safety. Students are strongly advised not to work more than twenty (20) hours per week. Scheduled work hours should not include the shift or tour of duty immediately prior to assigned clinical experiences. Students are expected to follow the Code of Ethics and function safely in the clinical setting.

9. **Weapons**: Actual or potentially hazardous objects (guns, knives, sharp objects, etc.) are not allowed in the clinical settings.

10. **Electronic Devices**: Pagers, cellular telephones, computers, cameras, tape recorders, and/or other electronic devices are not allowed in clinical settings. Specific devices identified by faculty in the course requirements are the only devices allowed in clinical agencies.

**SIMULATION LAB**

The simulation lab is an environment for nursing students to learn strategies that will enhance patient safety and quality of health care via practice with high-fidelity simulators. This provides the learner opportunities to practice nursing skills in a safe, non-threatening, and structured environment. Clinical simulation stimulates clinical reasoning, critical thinking skills and psychomotor competence in an innovative setting.

**Goals**

1. Increase the safety and effectiveness of patient care through inventive, interdisciplinary training.
2. Allow for practice learning away from the clinical setting.
3. Build confidence in clinical performance, including clinical reasoning and psychomotor skills.
4. Increase exposure to critical, yet low-frequency patient encounters in order to minimize the risk to patients.
5. Increase effective communication among all members of the health care team.
6. Develop simulation as a tool for assessment of clinical skills.
7. Use debriefing as a goal in each clinical simulation for immediate feedback.

Simulation is an important part of the nursing program. Students will complete assigned simulation during clinical sessions and lab with their instructor. Students must be appropriately dressed for the simulation experience in their nursing uniform. Students must wear their name tags always while participating in the simulation lab. Students are to bring their stethoscope, penlight, pencil/pen, and scissors when participating in a simulation activity. All students must participate in the Debriefing activities to be successful in simulation.
NURSING PROGRAM COURSES AND TESTING

COURSES
Course syllabus and other course information shall be posted on UDC-CC Blackboard or given to students on the first day of class. Students must have a UDC email account for Blackboard and other communications.

FINAL CLINICAL EVALUATIONS
Drug and Solution Computation Examinations are given in all practicum courses. As specified in the course syllabi, students are allowed three opportunities to successfully pass the computation examination. These three opportunities will be provided prior to the first clinical day. Failure to meet the minimum standard will preclude students meeting course objectives, receiving clinical assignments, and progressing.

Students must perform at satisfactory level on the clinical evaluation. Unsatisfactory performance of any components of the clinical evaluation will result in failure of the course.

TESTING
1. Examinations will be administered during regularly scheduled class periods via computer or paper.
2. Absence from an examination will only be excused for illnesses attested to by a physician's certificate, or for a cause, which the faculty may approve, by special consideration. There will be a specified time and date for make-up examination when the student's reason for being absent is satisfactory.
3. Standardized test will be used for evaluation for all theory/practicum courses, Complex Concepts Simulation Lab, Pre-Nursing entrance, Diagnostic Testing, and Exit Examination.
All mid-term and final exams will be standardized tests. Satisfactory performance must be at the current AAS Nursing Program benchmark. Faculty may approve standardized examinations as needed.

THE COSTS OF STANDARDIZED TESTS ARE THE RESPONSIBILITY OF THE STUDENT AND MUST BE PAID PRIOR TO TEST ADMINISTRATION.
NATIONAL COUNCIL LICENSURE EXAMINATION (NCLEX) INFORMATION

ELIGIBILITY REQUIREMENTS

During the last semester of the AASN curriculum, students apply for the licensing examination and licensure by the District of Columbia Board of Nursing or its counterpart in the jurisdiction where the student will practice after graduation. The National Council Licensure Examination for Registered Nurses (NCLEX-RN®) is the licensing examination developed by the National Council of State Boards of Nursing (NCSBN) to measure the minimum competencies needed to perform safely and effectively as a newly licensed, entry-level registered nurse. **Conviction of a crime other than a minor traffic violation could result in ineligibility for nursing licensure.** Under these circumstances, early notification of the appropriate state board of nursing is recommended to clarify mechanisms related to determining eligibility.

Students are expected to write the NCLEX-RN® exam within 60 days of graduation. Students writing later than 60 days will be referred to a review course prior to obtaining the Director of Nursing’s signature on the application.

NCLEX website: [https://www.ncsbn.org/nclex.htm](https://www.ncsbn.org/nclex.htm)
XII: STUDENT ACTIVITIES

STUDENT RIGHTS AND RESPONSIBILITIES

The faculty supports the National Student Nurses' Association Bill of Rights.

STUDENT BILL OF RIGHTS

1. Students should be encouraged to develop the capacity for critical judgment and engage in a sustained and independent search for truth.
2. The freedom to teach and the freedom to learn are inseparable facets of academic freedom. Students should exercise their freedom with responsibility.
3. Each institution has a duty to develop policies and procedures, which provide and safeguard the student's freedom to learn.
4. Under no circumstances should a student be barred from admission to an institution based on race, creed, sex, or marital status.
5. Students should be free to take reasoned exception to the data or views offered in any course of study to reserve judgment about matters of opinion, but they are responsible for learning the content for which they are enrolled.
6. Students should have protection through orderly procedures against prejudiced or capricious academic evaluations, but they are responsible for learning the content for which they are enrolled.
7. Information about student views, beliefs, and political associations, which the instructors acquire in their course work, should be considered confidential and not released without the knowledge or consent of the student.
8. The student should have a right to a responsible voice in the determination of his/her curriculum.
9. Institutions should have a carefully considered policy as to the information that should be a part of student's permanent educational record and as to the conditions of their disclosures.
10. Students and student organizations should be free to examine and discuss all questions of interest to them, and to express opinions publicly and privately.
11. Students should be allowed to invite or hear any person of their own choosing, thereby taking the responsibility of furthering their own education.
12. The student body should have clearly defined means to participate in the formulation and application of institutional policies affecting academic and student affairs.
13. The institution has an obligation to clarify those standards of behavior that it considers essential to its educational mission and community life.
14. Disciplinary proceeding should be instituted only for violations of standards of conduct formulated with significant student participation and published in advance through such means as a student handbook or generally available body of institutional regulation. It is the responsibility of the student to know these regulations.
STUDENT RESPONSIBILITIES:

Learning is the responsibility of the student. Everyone has preferred ways of learning and based on this, there is the expectation that knowledge of the specific learning style will be incorporated into strategies for success. In addition, the student is expected to function as a self-directed, accountable individual responsible for knowing the rules and regulations described in this handbook and to refer to it for questions regarding policies, procedures, and processes.

GRADE APPEAL PROCEDURE

The Nursing Program follows the grade appeals policy/process of the University. The chain of command or levels of authority are indicated on the organizational charts.

- Students must contact the course faculty for initial discussion of grades.
- Follow the established process for dispute of grades within one semester of receiving the grade.
- Faculty advisors are available to counsel students regarding the grade appeal policy.

GRIEVANCES

- Students with formal complaints are expected to attempt a resolution at the closest point of conflict (example: student and instructor).
- If there is no resolution with this attempt, the chain of command or levels of authority as indicated on the organizational charts will become involved until a decision is reached.
- Students are encouraged to contact their faculty advisor for initial discussion of issues and put concerns in writing.
- Upon request, a member of the Nursing Program’s Student-Faculty Relations Committee may serve as an unbiased facilitator for grievance resolution.
- If an appeal is not resolved at the program level, it goes to the Dean of Academic Affairs.
- Complaints of discrimination can be filed as is further described in UDC’s Student Handbook to address affirmative action, equal employment opportunities, disability-handicap-limitation accommodations, racial harassment, and sexual harassment.

Grievance Policy and Procedure

Students who feel they have been treated unjustly are entitled to appeal for an impartial review and reconsideration of their cases. The following procedures must be followed.

Step 1 Request a conference with the instructor or staff member involved.

Step 2 Should no solution be reached with the instructor or staff member, within five (5) working days request in writing a conference with the Director of Nursing. The written request should include the cause of the problem.
Step 3  If, after the written request is presented to the Director of Nursing and a conference held, the student is not satisfied, the student, within five (5) working days shall request, in writing, that the matter be considered by the Academic Dean.

Step 4  The Academic Dean will submit the appeal to a college-wide academic appeals committee for consideration and recommendation. The Committee, which includes faculty representative from various departments, as well as student representation, will submit its recommendation to the Dean within 15 working days from the date of receiving the case. The Dean will inform all parties involved of his/her decision.

If the grievance is not resolved, the student may continue the process up the Academic Level.

STUDENT ORGANIZATIONS

UDC-CC STUDENT GOVERNMENT ASSOCIATION

The Student Government Association (SGA) represents the UDC student body through a system of responsible self-governance and exercises general supervision over student affairs consistent with the mission and goals of the University. Through the association, UDC students represent themselves in planning and policy formulation in all areas that affect student life. The SGA is responsible for encouraging academic excellence and acts as a liaison between the student body, faculty, and academic administration. The SGA is also responsible for the following activities:

1. Publication (Student Newspaper)
2. Social Functions
3. Cultural Activities (Seminars, Workshops, Socials)
4. Senators

The Community College established branch student government in the spring of 2011 to meet the needs of UDC-CC students. The UDC-CC student government has four officers: President, Vice President, Treasurer, and Secretary. In addition, there are senators and a senator alternate for each major.

STUDENT NURSES' ASSOCIATION

The UDC Chapter of the National Student Nurses' Association encourages student participation. The purposes of the Association are as follows:

1. To provide opportunities for student participation in the development, maintenance, and evaluation of the AAS Nursing Program at UDC-CC.
2. To provide a vehicle for student identification with peers, affairs of the UDC-CC AAS Nursing Program, and leaders within the local and national nursing community.
3. To provide the means for representation of nursing students in university-wide activities.
4. To assist students in developing interest in and competencies for participation in professional organizations.

CHI ETA PHI SORORITY ALPHA GAMMA BETA (UDC) AND LAMBDA PHI (P.G. COUNTY) CHAPTERS

The UDC Chapter of Chi Eta Phi Sorority's motto is "Service to Humanity." The objectives of the sorority include elevating the standards of nursing. To qualify, a nursing student must:
1. Be in at least the second semester of the first year in the AAS Nursing Program.
2. Have a 2.5 cumulative GPA.
3. Submit a letter and an application for admission to the appropriate faculty sponsor.

The Lambda Phi Chapter Scholarships are for high school seniors accepted into a program for registered nurses and nursing students currently enrolled. Student must be in good academic standing and criteria include financial need, community service, and academic achievement.

NATIONAL BLACK NURSES' ASSOCIATION

The local chapter is the Black Nurses Association of Greater Washington DC Area, Inc. Membership is open to nursing students, Licensed Practical Nurses, and Registered Nurses without regard to sex, race, ethnic origin, or religion. The National Black Nurses Association (NBNA) was established to investigate, define, and determine what the health care needs of African Americans are and to implement change to make health care available to Black and other minorities, that is commensurate to that of urban society. Scholarships are awarded by the local chapter and by the NBNA. Scholarship information is available through the Student Faculty Relationship Committee, online, or through the Nursing Program Office. The deadline for the chapter scholarship is December 31st of each year. Criteria include good academic standing, community service, personal goals, and recommendations.

ACHIEVEMENT AWARDS

A.A.S. Nursing - Annual awards may be given by the nursing faculty to graduating students in the following areas:
1. **Highest Scholastic Achievement**: GPA of 3.3 or above.
2. **Adult Health Nursing**: Academic and clinical excellence and excellence in professional decorum.
3. **Nursing Care of a Child**: Academic and clinical excellence and excellence in professional decorum.

4. **Mental Health Nursing**: Academic and clinical excellence and excellence in professional decorum.

5. **Maternity/Newborn Nursing**: Academic and clinical excellence and excellence in professional decorum.

6. **Motivation**: Recommendation from the faculty and student body for the graduate who has completed the program of study in spite of extenuating circumstances.

7. **Student Service Award**: For dedicated service to students and faculty in the Nursing Program.

8. **Leadership**: For dedicated leadership service to students and faculty in the AAS Nursing Program.

**NURSING SCHOLARSHIP CRITERIA**

**APPLICATION PROCEDURE**

Applications and procedural details may be obtained from the AAS Nursing Program office. Notices and applications will be available from the AAS Nursing Program according to availability of funds. Specific criteria for scholarships and details for submission vary with the type of scholarship. Faculty is available to assist students to complete applications for scholarship awards.

**ELIGIBILITY REQUIREMENTS**

1. Student is currently enrolled in a clinical nursing course and is in good academic standing at the time of application.

2. Applicant has completed one clinical nursing course.

3. Application is complete and submitted by the deadline date. Many applications require verification of community service and a written essay.

   - Freedmen’s Hospital School of Nursing Alumni Scholarship
   - Tom Hickey Scholarship

**FREEDMEN’S HOSPITAL SCHOOL OF NURSING ALUMNI CLUB SCHOLARSHIP**:

The Freedmen’s Nursing Alumni Scholarship Fund is provided by the Alumni Club for nursing students at the University of the District of Columbia UDC from a general Scholarship Fund and a special scholarship that is designated only for UDC nursing students.

**Criteria:**

The general scholarship is awarded at the discretion of the Chairperson and faculty. The Louise Simmons Scholarship selection is made by the Freedmen’s Alumni Scholarship Committee. Student must complete an application.

The applicant must be able to satisfy the following conditions:

1. Be in good academic standing with an AASN or a BSN major.
2. Provide a written recommendation from the department’s chairperson
3. Must show proof of financial need.

**TOM HICKEY SCHOLARSHIP AWARD:**

The Tom Hickey scholarship awards have been provided to help cover tuition, fees, books, and other expenses directly related to completing the requirements of the nursing curriculum. Awards will be made for a total of $600.00 per semester for one full academic year. Scholarships will be awarded early in the summer of each academic year. The scholarship was made available by Mr. Hickey’s family to assist individuals in pursuing an associate or baccalaureate degree in nursing at the university of the District of Columbia UDC. Scholarship recipients will be selected by a committee consisting of two nursing faculty members and a member of the nursing profession from outside of UDC, and a member of the Hickey family.

**Tom Hickey Scholarship Award Criteria:**
1. Individuals who have practical experience in the care of terminally ill patients.
2. Home health aide or similar capacity (Must be enrolled at UDC).
3. Students currently enrolled in AAS Nursing Program and have completed one full year of study with a minimum of 41 semester hours.
4. Student currently enrolled in BSN and have completed two full year of study with a minimum of 62 semester hours.
5. Enrolled students must be in academic good standing.
XIII: RESOURCES

COUNSELING AND ACADEMIC ADVISEMENT

The nursing faculty is the focal point for advisement and counseling of prospective and continuing students. Students are assigned counseling alphabetically according to the first letter of their last name. Students should make appointments with faculty advisors for academic counseling to facilitate optimal progression through the program. This counseling should ideally be completed prior to the regular registration periods or as needed. New students (Freshman Level or Transfer) admitted to the University may declare an interest in nursing as a major during admission or registration processing and should report to the Student Success Center for advisement. Continuing nursing students are required to meet with their academic advisor at a minimum of three times a semester for academic advisement. Additional advisement and tutorial assistance is provided by the Student Success Center on the second floor of Building 53.

FINANCIAL AID

The Financial Aid Office provides a variety of financial aid assistance designed to help meet the needs of qualified students. Financial assistance is intended to supplement the maximum efforts of the student and the student's family in their attempts to meet college expenses. Financial assistance includes:
1. College Work-Study
2. Scholarships
3. Short-term loans
4. Grants

EMPLOYMENT

College work-study opportunities enable students to work at UDC or within a local or federal government agency or in a nonprofit off-campus organization. Applicants for this nursing program must be enrolled students registered for classes. In those situations where employment is necessary, an intensive effort is made to locate jobs that relate to a student's area of study, however, part-time employment or less is recommended for nursing students due to the intensive nature of the nursing curriculum.

LEARNING RESOURCES CENTER (LIBRARY AND MEDIA)

The University’s identification and library cards must be presented when receiving instructional services or equipment from the library or media center. Concentrated use of library and multi-media services are essential to optimally meet course objectives. The hours of operation are posted, and students may use the study rooms, computers, and media viewing equipment according to learning resource
center guidelines. Library and Media staff is available to assist students to use the resources effectively.

XIV: NURSING PROGRAM COMMITTEES

Faculty Organization meets as a Committee of the Whole when transacting business of the Nursing Program and in five Subcommittees for working sessions and specific objectives. Students are expected to serve on the Nursing Program Sub-Committees through Student Nurses’ Association selection.

ADVISORY BOARD

Section 1:  The Purposes

The purposes of the Advisory Committee shall be:

1.1 Support the goals and objectives set forth by the AAS Nursing Program.
1.2 Provide advocacy for nursing programs, both within the University system and the community.
1.3 Serve as consultant to the nursing program in relation to faculty, students, and curriculum.
1.4 A chairperson shall be elected.

Section 2:  Membership

The membership of the Advisory Committee shall be:

2.1 The current Director of the AAS Nursing Program (ex-officio member).
2.2 All of the full-time faculty members.
2.3 Registered nurses from the clinical, education, administrative, business and research sectors; alumni, and a nursing student.

ADMISSION, PROGRESSION AND GRADUATION (APG) COMMITTEE

Section 1:  The Purposes

The purposes of the APG Committee shall be:

1.1 Recruit, interview, advise, and counsel all prospective students on academic matters.
1.2 Compile data relative to determining a student's eligibility for matriculation.
1.3 Review data and recommend candidates for placement, progression, and graduation, or dismissal.
1.4 Submit written committee reports.
1.5 Update AAS Nursing Program handbook as needed on an annual basis.
1.6 A chairperson shall be elected.

Section 2: Membership

The membership of the Admission, Progression, and Graduation Committee shall be full time faculty members.

CURRICULUM COMMITTEE

Section 1: The Purposes

The purposes of the Curriculum Committee shall be to:

1.1 Develop, review, and evaluate the curriculum of each nursing level congruent with established standards.
1.2 Communicate curriculum recommendations, revisions, and changes to the respective faculty and the DON.
1.3 Submit an annual written committee report in May.
1.4 Update AAS Nursing Program handbook as needed on an annual basis.
1.5 A chairperson shall be elected.

Section 2: Membership

The membership for the Curriculum Committee for the AAS Nursing Program shall be full time faculty and one elected AAS Nursing Program student representative.

STUDENT-FACULTY RELATIONS COMMITTEE

Section 1: The Purposes

The purposes of the Student-Faculty Relations Committee shall be to:

1.1 Promote a cooperative working relationship between faculty and students.
1.2 Encourage student participation in professional nursing organizations and community activities.
1.3 Plan and coordinate student convocation, pinning ceremony, and awards for graduating students.
1.4 Coordinate the review of scholarship applicants and make scholarship recommendations to appropriate individuals.
1.5 Update the AAS Nursing Program handbook as needed on an annual basis.
1.6 Submit an annual written committee report in May.
1.7 A chairperson shall be elected.

Section 2: Membership

The membership for the Student-Faculty Relations Committee shall be full time faculty and one elected AAS Nursing Program student representative.

OUTCOME COMMITTEE

Section 1: The Purposes

The purposes of the Outcome Committee shall be to:

1.1 Plan and coordinate the collection of data
1.2 Plan and coordinate the analysis of the data
1.3 Communicate the results of the data
1.4 Utilize the data to make decisions on the nursing program
1.5 A chairperson shall be elected.

Section 2: Membership

The membership for the Outcome Committee shall be full time faculty and one elected AAS Nursing Program student representative.

XV: NURSING STUDENT HANDBOOK RECEIPT FORM

Attention: Professor Susie Cato, Director of Associate Degree Nursing Program
Division of Nursing, Allied Health, Life and Physical Sciences
University of the District of Columbia Community College
801 North Capitol Street, NE, Room 812
Washington, D.C. 20002

☐ I have received the Nursing Program Handbook. Date: ____________________________
☐ I am responsible for following the regulations and guidelines specified in the Nursing
  Student Handbook.
☐ I understand that ________________________________ is my nursing
  faculty advisor and I am responsible for meeting with my advisor before each
  registration period to guide my academic progress as well as make appointments for
  advisement during the academic year as the need arises.

Printed Name  ____________________________  Signature  ____________________________

COMPLETE BOTH SECTIONS OF THIS FORM. ONE PART WILL BE PLACED IN YOUR FILE.

----------------------------------------------------------------------------------------------------------------------------------

NURSING HANDBOOK RECEIPT AND ADVISOR VERIFICATION FORM

Attention: __________________________________________, Faculty Advisor
University of the District of Columbia Community College
Associate of Applied Science in Nursing Program
801 North Capitol Street, NE Building 53 Room__________
