Hamburg, Germany’s second largest city, is home to two of the most important urban development areas in Europe: HafenCity and the International Building Exhibition (IBA). Both projects embrace the vision of a European city meeting the challenges of the future without abandoning its unique traditions and character. HafenCity, Europe’s largest inner-city development project, is setting new standards for ecological sustainability and mixed use development along the Elbe River in Hamburg, Germany. The International Building Exhibition (IBA) is applying experimental design and urban planning to a neglected inner-city island, transforming it into a vibrant and sustainable area.

**DIALOGUE CONFERENCE**

**HAMBURG**

Building the City Anew. A Journey into the City of Tomorrow.

**Friday, November 15, 9 am – 12:30 pm**

The City of Hamburg, Germany is a city-state. Like Washington, DC, Hamburg is an administrative entity that consists solely of the city itself without a rural area surrounding it. Hamburg is commercial, compact, and comfortable. At the same time, it must meet the needs of its citizens, attract businesses and visitors, and re-invent itself ever anew in order to keep pace with the times. The half-day conference will explore various strategies and initiatives Washington, DC and Hamburg are undertaking to meet the demands of a modern city that is ecologically sound and economically vibrant.

9 am Registration

9:30 am Welcome  
**Dr. Rachel Petty**, Interim Provost, University of the District of Columbia

9:35 am Opening Remarks: Hamburg Hafencity & IBA Hamburg
