(the Act), the District shall apply preferences in evaluating proposals from businesses that are small, local, disadvantaged, resident-owned, longtime resident, or local with a principal office located in an enterprise zone of the District of Columbia.

B.4 UDC contemplates award of a guaranteed maximum price contract. At the end of the Pre-Construction Phase, the Design Builder will be required to develop a Guaranteed Maximum Price (GMP) proposal for the submission to UDC. Assuming this proposal is accepted, a GMP Amendment will be signed by UDC and the Design-Builder, and the Design-Builder will be required to complete the Project on schedule and for an amount that does not exceed the agreed upon GMP.

- Design-Builder Fee (profit and overhead)
- Design-Builder General Conditions

**Total**

**Phase II Construction (Target GMP)**
- Construction Cost

$__________ to $__________
The high end of the each Offeror’s Construction Cost range will become the Offeror’s Target GMP. The Target GMP should be presented in the Standard 33 Division format and should include sufficient level of detail to understand the assumptions that were included within the Target GMP. UDC intends to use the Target GMP to manage the Project’s budget, and as such, Offerors should submit a Target GMP that represents their best judgement as to the Project’s actual cost. UDC expects that Offerors will prepare a reasonably detailed cost estimate to prepare the Target GMP. In order to ensure that the Target GMPs represent the Offeror’s best judgement of the costs, an Offeror will be required to forfeit 10% of the Design-Build Fee in the event that the final GMP exceeds the Target GMP. Offerors are further advised that a Target GMP that lacks sufficient detail or which omits funding for obvious aspects of the necessary work will render the Offeror’s proposal non-responsive.
SECTION C: SPECIFICATIONS/WORK STATEMENT

C.1 PROJECT BACKGROUND

In the Fall of 2009 the District City Council passed legislation transferring ownership of Bertie Backus Junior High School building (“Backus”; the “facility”), a former District of Columbia Public School property located at 5171 South Dakota Avenue, NE, Washington DC to the University of the District of Columbia (“UDC”; the “University”) for use in further developing the Community College of the District of Columbia (“CCDC”, the “College”). The University has developed a comprehensive phased implementation plan for utilizing the entire property to support the development of the College. Phase 1 is the first step in the comprehensive re-use of the entire 4.6 acre site and will include designing and constructing programming space for the Nursing, Workforce Development and General Studies programs of CCDC for the beginning of the Fall 2010 academic year. Additionally, the phase will include designing and constructing academic and administrative space for use by a Public Charter School (PCS) beginning Fall 2010 school year.

C.2 SCOPE

The University is seeking a qualified Design-Builder (the “Contractor”) to perform design, permitting, site preparation, construction, construction management, commissioning services and other related services as necessary to complete Phase 1 of the planned utilization of “Backus”. The facility is a 130,000 Sq. Ft property built in the early 1960’s and operated as a District school until the 2007–2008 school year. The Design-Builder will renovate approximately 45,000 Sq. Ft of the property for occupancy / substantial completion no later than August 20, 2010. The University has developed a layout (Addendum J.1.3) to guide the Phase 1 work. The Design-Builder may make alterations to the layout as deemed necessary to achieve the requirements of the University. However, the end product must sufficiently satisfy the program requirements of the University listed in this RFP. In performing the requirements of this RFP, the Design-Builder shall, at all times, utilize superior construction standards of care required for quality classrooms, office and support spaces for the University.

C.3 PROGRAM REQUIREMENTS

CCDC requires the completed Phase I effort to provide certain program elements in order to meet the educational and administrative needs of the Workforce Development, Nursing Certification and Public Charter School programs. The following program elements are to be considered mandatory for a successful completion of this project. The Design-Builder will not be allowed to make modifications to quantity of listed program elements; however the Contractor may make recommendations on changes to the location of program elements based on the ability of said modification to aid the project schedule and/or budget.

Base Program:

- 29 Instructional spaces to include traditional classrooms and laboratory spaces;
- 3 Office Suites made up of closed offices as well as bullpen configuration workstations clusters
- 2 Entry Lobbies
- Support Storage
- Restrooms
These elements are to be created using the existing layout of interior walls. In addition to the program elements listed above, the design is expected to provide any additional program elements required by governing regulatory laws.

C.4 EXISTING FACILITY

The existing facility is a three level, 130,000 GSF building built in 1960. A Facility Conditions Assessment has been completed and identified. There are no issues with the facility’s structural integrity. A copy of the completed report is included in Addendum J.1.6. The following are key findings of the report:

C.4.1 The assessment identified the existing windows as needing replacement due to their deteriorated condition;
C.4.1 The interior walls are constructed of glazed concrete masonry units and considered in good condition. This effort is envisioned not to include altering any interior walls;
C.4.1 The corridors are lined with metal student lockers. The Design-Builder shall permanently remove the lockers. The resulting void is to be repaired with painted gypsum wall board.
C.4.1 The tiled corridor flooring is deteriorated and should be replaced with carpet tiles or vinyl composite tiles;
C.4.1 The classroom floors are covered by damaged carpet and vinyl composite tiles. All flooring surfaces in the classrooms should be replaced with commercial grade carpet tiles or new vinyl composite tiles;
C.4.1 The building has a primary and secondary entrance and both are to be secured and utilized as part of this requirement.

In addition to all interior and/or exterior renovations including in above recommendations that are required as part of this scope of work, the workload shall also include but not be limited to the following:

C.5 WINDOW REPLACEMENT

It is desired the windows of the building be replaced as part of this effort. However, the Design-Builder may propose alternate solutions which may positively affect the project schedule or budget.

C.6 PRE-ENGINEERED ROOM-LESS ELEVATOR SOLUTION

Design-Builder shall design and install a pre-engineered room-less elevator solution as part of the space renovation.

C.7 HEATING VENTILATION & AIR CONDITIONING SYSTEM SOLUTION

The developed space will also need a fully functional Heating Ventilation & Air Conditioning system as well as fully functional Mechanical, Electrical & Plumbing system. The Design-Builder shall propose and install an MEP solution to providing operational building systems that can adequately support the intended use of each space, while minimizing the initial capital investment.
C.8 SECURITY

The Design-Builder shall ensure that all exterior doors and operating windows have new locking devices. In addition to the physical security measures, the Design-Builder shall conduct a physical security assessment of the facility sufficient to propose and install an adequate electronic intrusion alarm/monitoring system.

C.9 FIRE SUPPRESSION AND FIRE ALARM SYSTEM

The Design-Builder shall propose and install a fire suppression system and a fire alarm monitoring system for the renovated portion of the building that adheres to all governing regulations and codes required for operating classroom and office spaces.

C.10 VOICE AND DATA INFRASTRUCTURE CABLE DESIGN AND INSTALLATION

The Contractor shall provide the University as part of their proposal for the installation of voice and/or data cabling infrastructure. The requirements are outlined in the attached Blanket Statement of Work.

C.11 INSTRUCTIONAL & ADMINISTRATIVE SPACES

The existing building has three levels. It is anticipated the two of these levels will be used by the College and the third level will be used by the PCS.

C.11.1 CCDC Instructional Spaces (First Floor & Third Floor)

Design of the spaces for the CCDC will require providing a minimum of 20 classrooms. These spaces will be divided between the first and third floors. Each space should be newly painted and receive new commercial grade carpet tiles or vinyl composite tiles. The light fixture should be replaced as required to maximize light levels while minimizing utility consumption. Two of the existing classroom spaces in the facility are to be “Wet Labs” with gas, water, and electrical services to multiple locations within the space. The second floor of the facility has two existing Wet Labs. The equipment and utilities in these spaces may be used to convert spaces on the first or third floor into a functioning Wet Lab. The windows in all instructional space are to be replaced with new window units or a recommended repair effort. All existing classroom doors are to be inspected for reuse or replaced with wood doors, new hardware and hollow metal frames. It is anticipated two floors of the building will be required to satisfy the CCDC program. Access between the two floors should be provided via use of the new elevator or vertical circulation. “The facility entrance off of South Dakota Street should be converted into a lobby for the CCDC operation.”

C.11.2 CCDC Office Spaces (First Floor)

Design of the office suite to be used by the College is to utilize as much of the existing “Principal’s Office Suite” layout as possible in an effort to avoid the relocation of existing or building of new interior walls. If required to successfully complete the effort, an existing classroom space may be converted to a bullpen for office workstations. This will require providing power to the modular furniture workstations to avoid the use of vertical power poles. The selected Team will determine the maximum number of office
spaces that can be developed within the existing floor plan. It is preferred that all flooring be covered using commercial grade carpet tiles. All existing interior walls are to be painted. All existing interior doors are to be inspected for reuse or replaced with wood doors, new hardware and hollow metal frames.

C.11.3 PCS Instructional Spaces (Second Floor)

The anticipated location of the PCS spacers is the second floor. The PCS spaces should include providing 9 classrooms with newly painted walls and new vinyl composite tile flooring. The light fixture should be replaced as required to maximize light levels while minimizing utility consumption. All windows in the PCS instructional spaces are to be replaced with new window units or a recommended repair solution. All existing interior door are to be inspected for reuse or replaced with wood doors, new hardware and hollow metal frames. Note: The layout of all PCS spaces must be physically separated from the CCDC spaces. The facility entrance off of Hamilton Street should be converted into a foyer for the PCS operation.

C.11.4 PCS Office Spaces (Second Floor)

Design of the office space to be used by the PCS program is to utilize an existing classroom. The room should be developed to support two enclosed offices and modular workstations for 6 staff members. The work stations are to be supplied with modular furniture units as to avoid the use of vertical power poles. The flooring in all PCS office spaces is to be covered using commercial grade carpet tiles. All existing interior walls are to be newly painted. All existing interior doors are to be inspected for reuse or replaced with wood doors, new hardware and hollow metal frames.

C.12 Period of Performance

The Design-Builder will be required to achieve substantial completion no later than August 20, 2010. It is anticipated that a contract will be executed by May 14, 2010. The resulting duration of this effort will be 98 calendar days. While substantial completion must be reached no later than the date indicated; the Contractor may be allowed to complete “Punchlist” no later than August 31, 2010. The following are project milestone dates considered critical to the successful completion of this effort:

- Projected Notice to Proceed May 14, 2010
- Substantial Completion August 20, 2010
- Punch List August 31, 2010
